

Eco-Visual Tales

Crafting Environmental Stories with AI

Event Recap

On **Tuesday, 25th June 2024**, the **Eco-Visual Tales** event took place in Room J-13. Students from various branches gathered to showcase their creativity and environmental advocacy skills. Let's revisit the highlights of this exciting event:

Event Structure

- Registration:**
 - Teams of 2-3 members enthusiastically registered for the event.
- AI Image Generation:**
 - Participants harnessed the power of AI to create five captivating images based on environmental prompts.
- Story Crafting:**
 - Within the intense one-hour timeframe, teams skillfully wove these AI-generated images into compelling narratives with strong environmental messages.
- Judging Criteria:**
 - Projects were evaluated based on creativity, clarity of message, effective image integration, and presentation skills.

Student Enthusiasm

- The room buzzed with excitement as teams collaborated, brainstormed, and brought their visions to life.
- Students leveraged tools like Copilot and ChatGPT to enhance their storytelling prowess.

Presentations

- Each team confidently presented their finished stories, demonstrating their ability to combine artistry with environmental consciousness.
- The panel of judges listened attentively, impressed by the fusion of creativity and technology.

Winning Moments

- The winning teams received well-deserved applause for their impactful narratives.

-
- The event showcased how AI and storytelling can be powerful allies in advocating for a greener, more sustainable world.
